May is National Physical Fitness and Sports Month! Regular physical activity is good for everyone’s health, and people of all ages and body types can be physically active. Here are a few benefits of physical activity, such as parkour:

- Children and adolescents – Physical activity can improve muscular fitness, bone health, and heart health.
- Adults – Physical activity can lower the risk of heart disease, type 2 diabetes, and some types of cancer.
- Older adults – Physical activity can lower the risk of falls and improve cognitive functioning (like learning and judgment skills).
